Experience

WINIT Softwares Pvt Ltd. - Software Developer October 2025 - Present

- Created React Native mobile **SFA** applications and NextJS Web portals for organisations like **Coca-Cola**, **NFPC**, **Redington**, **Multiplex** and **ESF** to track KPIs, planograms and sales performance.
- Added **offline first** functionality with **SQLiteDB** and **AsyncStorage**, with **auto-syncing when online**, increasing sales performance by **70%**
- Added **Push Notifications** with **native channels** for **SFA activities** including **tracking, analysis & approvals**
- Resolved a **Google Maps API** crashing error native to **iOS**, restoring sales operations within one business day to mitigate further revenue loss, for **Redington (biggest distributor of electrical goods in middle-east)**

Locofy - React Native Developer | Playstore January 2025 - August 2025

- Integrated **OTA** update support using **Stallion** library & Forced Updates via **Firebase Remote Config**
- Added **Google Analytics** and **Facebook Ads** support to track user behaviour for better **User Experience**
- Added** media upload using **react-native-background-upload** library with status tracking to reduce UI janking
- Implemented** parallel media upload/download in chunks using **signed URL** from **Cloudflare** and **CDN**, increased upload/download speed by **80%**
- Engineered **Instagram-like** story module with **Android Recycler View**, **EXOPLAYER** library & React Native side **Pool Cache** to handle multiple image/video stories of **500+** users

Contract Projects

OneCart | React Native, NextJS, MongoDB, AWS

- Deployed scalable **Serverless** backend on **AWS** for user/seller with **Clerk & Custom auth** & inventory **CRUD**
- Integrated **Stripe payments** with order creation and tracking functionality with updates via **Firebase Push Notifications** integrated with native channels
- Integrated **Agora RTC** for live video streams, supporting real time bidding & global chat via **Websocket** handling **1k+** live users simultaneously

MonkDB | NextJS

- Architected a **multi-model AQI Intelligence Platform** integrating **CPCB** and **OpenAQ** APIs, leveraging **time-series, geospatial, and vector search** for pollution monitoring.
- Designed an **AI correlation engine** using **ARIMA** and **Random Forest** to execute **geo-temporal analysis**, generating 24-hour **AQI** forecasts and automated source-identification alerts.

TeacherPau | NextJS | NeonDB (PostgreSQL) | DrizzleORM

- Built a **EdTech SaaS** using with **WebRTC** classrooms for live video sessions, **JWT** auth, **gamification** and 3-tier subscriptions — turning a solo teacher into a **scalable global platform**.
- Shipped a teacher command center with **role-based access**, slot scheduling, 6 level skill scoring, **CMS** and submission analytics — replacing **15+** scattered **workflows** with one interface.

Projects

Organisation.EasyEnterpriseOS | NextJS, NeonDB | Organisations

- Built a **multi-tenant enterprise org management platform** with custom OAuth featuring PKCE-backed **SSO (Single sign-on)**, **giving centralised auth**, **JWT** signing with token rotation, **role-based access control** and subscription management.
- Developed end-to-end **HCM capabilities** and centralized auth infrastructure — people management, nested departments, reporting hierarchies, skills & certification tracking, asset inventory, audit logging, AI-powered data import (Gemini/Claude), **interactive org chart**

V.O.I.D (Voice Over Intelligent Daemon | Python | Faster-Whisper(STT) | Piper TTS

- Built a real-time voice-controlled Linux assistant using Python, faster-whisper, Piper TTS, and Gemini API with fully local, CPU-optimized inference and low-latency streaming audio.
- Implemented 40+ voice commands for app/system/file control with multi-threaded architecture, safety filtering, and an animated 60 FPS Pygame interface.

Education

Ajay Kumar Garg Engineering College August 2021 - June 2025

Bachelor of Technology in Information Technology Ghaziabad, UP, India

Ashok Memorial Public School June 2020

CBSE (10 + 2) - 93% Faridabad, Haryana, India

Technical Skills

Languages: JavaScript, TypeScript, C++, Dart, HTML/CSS, Python

Technologies: React Native, Flutter, ReactJS/NextJS, SQLite, Firebase, NodeJS/ExpressJS, AWS

Tools:Git, Claude Code, CursorAI, OpenClaw, Figma-MCP, Ollama, LangChain, Azure DB, ElevenLabs
